Green Gecko

Professional eco friendly carpet & upholstery cleaning

WHO or what is Green Gecko?

Julie and Tim Lang are a husband and wife team based in Wadebridge. We have set up a carpet and upholstery cleaning business because we feel that there is a market for an eco friendly and professional service here in North Cornwall. As a small business, this allows us to give a very competitive price whilst maintaining the standards that our customers expect. We are an honest, trustworthy and reliable local family it is our aim to tailor our services to meet our customers' expectations. So if you require your restaurant carpet and upholstery cleaned, your guest house, holiday property, club or your home, the service and attention to detail remains the same.

"It was always our aim to source the best eco friendly products on the market. Having a small child and dogs ourselves we believed this to be particularly important. Some people may feel that they just want a clean carpet, to other

people this may be very important. Either way we feel that we have achieved these aims, without compromising on cleaning performance. Mentioning the word eco should in no way be perceived as extra costs to our customers. In fact our cleaning solutions and pricing are no more expensive than anything else available on the market.

"We fully understand that our small business will benefit from word of mouth, and to that end the feelings and opinions of our future customers are paramount to our success. We assure you of our best intentions at all times and arrange a convenient appointment to carry out a comprehensive and written, no obligation survey.

"Periodic cleaning will ensure that carpets and upholstery life is drastically improved and the quality of which you and your family live in is enhanced. The removal of dirt, allergens, dust and other particles, will be beneficial to everyone in your

household. "All carpets and upholstery are pre-vacuumed, spots and stains removed prior to an eco-friendly pre-spray and agitation, ensuring that the pre-spray is evenly distributed. Carpets and upholstery are now deep extracted, drawing up dirt and solutions ensuring a residue-free rinse that helps prevent re-soiling.

"The products in our range use powerful natural-molecular

technology, combined with advanced biotechnology techniques. The result of this new technology is an amazing range of environmentally friendly and biologically active cleaning solutions, which clean without compromising on performance or safety. The products are fully biodegradable, non-toxic to humans and pets, non-hazardous and non-polluting.

"Following your

Christmas and New Year celebrations we look forward to meeting our new customers in 2011.

We would like to say a huge thank you to the following for the help and advice in setting up Green Gecko: Local artist Tracy Hunter for our logo design and huge encouragement. Cam in The Little Red Octopus for his computer wizardry and support. Graeme at NetServer for his patience whilst designing our website. Tim

at County Signs for pulling out all the stops at short notice for the van logos. Wofina, Bodmin for our embroidery and labelling solutions. Nick at World of Clean for our cleaning equipment and solutions. Alexander & Co. Accountants.

"A special thank you goes to all our friends for their support and last, but not least, to my wife Julie for her endless support."

CRY - Changing life possibilities in Cambodia and elsewhere

DESPITE all the financial uncertainties surrounding us, all CRY (Care and Relief for the Young) met all its promises to

overseas projects in 2010. Already this year funds are being made available for CRY to complete its project to reduce infant

mortality rates in five regions of Cambodia. CRY has also now set up two 'Waiting Houses' there for mums to go to when their baby is expected. This includes transport to the centre, some medical help, a rest time and then transport home again - the sort of support we take for granted here in the UK. Funds are now to hand to provide the additional three centres in the coming two years.

Local people here in Cornwall are contributing on a regular basis now to this wide-ranging and invaluable work and on Saturday 22nd January supporters in St Brevard joined the CRY Bears in

promoting the work of the Cuffee and Sains Morning fund at the village Methodist Church. A wide variety of interesting items were on sale including hand-made 'decoupage' framed pictures - especially supplied to CRY, with a total of £85 being raised from both the sale and the refreshments.

Do keep an eye out for a whole range of events and opportunities that are being pursued this year by local CRY groups based in North Cornwall. For further details please contact Ray Avenel, local CRY co-ordinator, on 01208 816601 or by email at ray@cryuk.com
